THE X39 *Light Technology* PATCH

The X39 Light Technology patch is made of organic crystals (amino acids, salt, water and oxygen) and forms a perfect lattice structure.

This lattice structure is a reflector of light. Whose light? Your Light!

Our bodies radiate a low grade infrared light.

We know this is true because people use night vision goggles to see that light.

When a patch is placed on your body, it reflects back your own light to make change in your body. We call that PhotoBioModulation - Light Making Change In Your Body! And this light works fast to turn old cells young again!

Just read the patent to see what light technology can do!
